WIRING (GENERAL GUIDANCE)

FIXTURE WIRE	CONNECT TO
● Black (or ribbed)	Line / hot
○ White (or smooth)	Neutral
● Green / bare copper	Ground

1. Turn power off at the breaker and confirm it is off with a non-contact tester.
2. Run cable to the fixture location in conduit or direct-burial cable as your local code requires, and mount the fixture on its base or stake.
3. Make the connections above with approved connectors and fold the wires neatly into the box.
4. Fit the backplate, install bulbs within the rated wattage, restore power and test.

BEFORE YOU INSTALL

- ☐ GFCI-protected outdoor circuit
- ☐ Cable route planned (conduit or direct-burial)
- ☐ Supply voltage confirmed for your region
- ☐ Utility lines located before digging (call 811 in the US)
- ☐ Power off at the breaker before any work begins

PLACEMENT GUIDELINES

HEIGHT
Post lights typically sit 5–7 ft (1.5–2.1 m) above grade at a gate, drive or path.

PLACEMENT
Set the post about 2–3 ft (61–91 cm) back from the drive or walkway edge.

FOOTING
Anchor the post on a concrete footing or mounting pier as your local code requires.

Safety. Turn off power at the breaker before installing. Installation must follow local electrical codes (the NEC in the US). We recommend a licensed electrician for every hardwired fixture. Never exceed the rated wattage.
