● Blue (if present)	Light kit switch leg

1. Turn power off at the breaker and confirm it is off with a non-contact tester.
2. Fix the fan bracket to a ceiling box marked 'acceptable for fan support', using the hardware supplied.
3. Make the connections above with approved connectors and fold the wires neatly into the box.
4. Fit the canopy, restore power and test. The LED is built in, so there are no bulbs to fit.
