PACKAGING

Arrives with wall-mount hardware and fitting guide

For your electrician

ELECTRICAL

SUPPLY VOLTAGE	110V
LIGHT SOURCE	Integrated LED, warm white
COLOR TEMPERATURE	Warm white
INSTALLATION	Wall-mounted above or beside a mirror; hardwired 110V

WIRING (GENERAL GUIDANCE)

FIXTURE WIRE	CONNECT TO
● Black (or ribbed)	Line / hot
○ White (or smooth)	Neutral
● Green / bare copper	Ground

1. Turn power off at the breaker and confirm it is off with a non-contact tester.
2. Fix the mounting bracket to a recessed wall junction box rated for the fixture's weight, using the hardware supplied.
3. Make the connections above with approved connectors and fold the wires neatly into the box.
4. Fit the backplate, restore power and test. The LED is built in, so there are no bulbs to fit.

BEFORE YOU INSTALL

- ☐ A recessed wall junction box at the planned mounting height
- ☐ Supply voltage confirmed for your region
- ☐ Wall surface flat and able to carry the fixture's weight
- ☐ A dimmer, if used, rated for the light source
- ☐ Power off at the breaker before any work begins

PLACEMENT GUIDELINES

ABOVE A MIRROR
Centre the fixture about 75–80 in (190–203 cm) above the finished floor, just above the top of the mirror.

WIDTH
Choose a fixture roughly 75% of the mirror width, never wider than the vanity.

BATHROOMS
Suitable for damp locations only where rated; keep clear of direct water spray.

Safety. Turn off power at the breaker before installing. Installation must follow local electrical codes (the NEC in the US). We recommend a licensed electrician for every hardwired fixture. Never exceed the rated wattage.
